CHANAKA HERATH

ASSOCIATE SOFTWARE ENGINEER

I'm a software engineering undergraduate at the University of Kelaniya and also a committed learner in this passionate field. With dedication, I wish to start my dream carrier as an associate software engineer and to move upward step by step. Willing to face new experiences with challenges, along with my team building and good communication skills, I'm ready to customize my abilities to meet the organizational needs of the company, highlight the core competencies, and work for further success.

Cloud sensor monitor (Group Project)
This is a cloud-based sensor monitoring and alert
management platform which can be used to
centrally monitor any device regardless of its
location. The main functionality of the system is
to alert certain events based on the readings
coming from the sensors. This is developed from
using Angular, Spring, and Java.
